Reedsburg, WI 53959

Dear Ms. Kokenzie;

RE: Inquiry on Renegade Parts Washer Cleaning Solution

The Detroit Water and Sewerage Department (DWSD) provides wastewater treatment, for sanitary wastewater, and other compatible wastestreams, at its Detroit facility. I have reviewed the information provided on the Renegade Parts Washer Cleaning Solution, and do not find the material to pose a risk or apparent problem to the Detroit system.

Any discharge of wastewater to the Detroit sewerage system must satisfy the requirements of the City of Detroit Ordinance 08-05 and the pollutant limitations stated therein. Please be advised that the nature of the parts being washed and the period of solution usage may contribute pollutants requiring treatment or off-site disposal.

Be advised that any discharge of this material within the tri-county area of Wayne, Oakland and MaComb counties, must be authorized and approved prior to discharge. Approval requests must be presented to the DWSD through an Industrial User survey request. This request may be obtained by contacting Mr. Jerry Spencer at 313-297-5842.

Sincerely,

Stephen J. Kuplicki
Manager, Industrial Waste Control Division
