Re: Renegade Parts Washer Cleaning Solution

Dear Mr. Roberts,

Based on information supplied by your company, it appears, at this time, that disposal of small volumes of the above referenced cleaning solution into the City of East Lansing Wastewater collection system would be in compliance with the City's Sewer Use Ordinance. As you indicated, these volumes from any one particular commercial facility would not exceed 50 gallons per month. If at any time, it is determined that this material is the cause of problems in the City's collection system and/or at the City's Wastewater Treatment Facility, the City reserves the right to order immediate cessation of any and all discharges.

Also, please be advised that if this material is used at any facility located on Michigan State University's property or any location in Meridian Township, permission to dispose of the solution into either jurisdictions collection system must be obtained from those respective entities.

Please contact me if you have any further questions regarding this matter.

Jeffery Johnston, Superintendent
