

TOP LOAD SERIES

I-SERIES TL 33 WD

Small Multi-Stage Parts Washer

The Renegade I-Series TL-33 WD combines automatic washing and drying in a top-load system built for repetitive production cleaning. Programmable controls help deliver a consistent two-stage process from one load to the next.

Each system is built to order around your parts, contaminants, cleanliness requirements and workflow. Options for rinsing, filtration, controls, fixtures and material handling allow Renegade to configure the machine for the process without adding complexity you do not need.
