

I-Series PT 2416 WRD

Most Common Pass-Through Conveyor Washer with Non-Marring Belt

PRODUCT OVERVIEW

The Renegade I-Series Pass Through 2416 Wash, Rinse, Dry (I-Series PT 2416 WRD) parts washer delivers 3-stage continuous operation to clean and dry complex, **multi-ported parts** transported via inline acetal plastic or flat-wire belt conveyor operation. Each wash and rinse stage compartment contains spray manifolds with **strategically-placed nozzles to deliver high-pressure force and high temperature cleaning**. The dry stage contains a heated convection style dry to create a hot dry environment.

Our Renegade I-Series Pass-Through or “conveyor” parts washers are designed for high production and repetitive cleaning operations. Your part would move through the modular cleaning system on a conveyor belt and could pass through multiple cleaning stages—such as wash, rinse, and dry. A Renegade I-Series Pass-Through Parts Washers can improve productivity and operational efficiency by automating the cleaning process, reducing labor costs, and ensuring consistent results.

Industry 4.0 Compatible: This Renegade I-Series system is Industry 4.0 compatible meaning it can be connected to real-time monitoring, predictive maintenance, and customizable interfaces, making cleaning systems smarter, more efficient, and cost-effective.
