

# I-Series PT 2125 Heavy Duty WD

## Engineered Solution for Extreme Grease Removal

### PRODUCT OVERVIEW

The Renegade I-Series Pass Through 2125 Heavy Duty Wash, Dry (I-Series PT 2125 HD WD) is designed to clean heavily contaminated parts, that are too heavy for a traditional conveyor belt. The wash stage contains oscillating spray manifolds with strategically-placed nozzles to deliver high pressure force and high temperature cleaning. The dry stage contains a powerful air blower to remove residual water from even **hard to reach cavities**.

**Our Renegade I-Series Pass-Through** or “conveyor” parts washers are designed for high production and repetitive cleaning operations. Your part would move through the modular cleaning system on a conveyor belt and could pass through multiple cleaning stages—such as wash, rinse, and dry. A Renegade I-Series Pass-Through Parts Washers can improve productivity and operational efficiency by automating the cleaning process, reducing labor costs, and ensuring consistent results.

**Industry 4.0 Compatible:** This Renegade I-Series system is Industry 4.0 compatible meaning it can be connected to real-time monitoring, predictive maintenance, and customizable interfaces, making cleaning systems smarter, more efficient, and cost-effective.
