

I-Series PT 4824 WRD

3-Stage Pass-Through Washer w/ Wide Belt Conveyor System

PRODUCT OVERVIEW

The Renegade I-Series Pass Through 4824 Wash Rinse Dry (I-Series PT4824 WRD) is a production cleaning system. This system delivers **continuous operation to clean and dry complex, multi-ported parts transported via wide conveyor belt.**

Each wash and rinse stage compartment contains spray manifolds with **strategically-placed nozzles** to deliver high-pressure force and high-temperature cleaning. The optional gas-heated dry stage compartment contains a dual chamber and a variable speed-driven power vent to aid with steam removal.

Our Renegade I-Series Pass-Through or “conveyor” parts washers are designed for high production and repetitive cleaning operations. Your part would move through the modular cleaning system on a conveyor belt and could pass through multiple cleaning stages—such as wash, rinse, and dry. A Renegade I-Series Pass-Through Parts Washers can improve productivity and operational efficiency by automating the cleaning process, reducing labor costs, and ensuring consistent results.

Industry 4.0 Compatible: This Renegade I-Series system is Industry 4.0 compatible meaning it can be connected to real-time monitoring, predictive maintenance, and customizable interfaces, making cleaning systems smarter, more efficient, and cost-effective.
